

Job Opening: Materials and Structures Laboratory

One position is open for an Assistant Professor

(Structural Engineering and Earthquake Engineering)

1. Position Title

Assistant Professor

2. Area

Advances in Structural Engineering and Earthquake Engineering in Steel Building Structures

3. Qualification

Ph.D degree. The applicant should have strong interests and excellent achievements in the required research field. Experienced skills in the experimental research are necessary.

4. Job Starting Date

As soon as possible.

5. Duration and Terms

5 year contract, renewable once for additional 5 years.

During the additional 5 years, tenure may be obtained after review.

Salary is commensurate with related rules of Tokyo Institute of Technology.

6. Job Location

Materials and Structures Laboratory, Tokyo Institute of Technology

7. Required Documents

- (1) Resume with signature and a photo should include a list of license of operating experimental equipment, e.g. crane, if any.
- (2) A list of academic achievements categorized in `Refreed papers`, `Published books/book chapters`, `Awards`, and `Others` (such as research funds and patents).
