DUT, U-Tokyo & Tokyo Tech Joint Webinar on Advanced Steel Seismic Design

Aug. 19th, 2020

Cui (Snoopy) Lab has been devoted to the seismic design of steel structures for years. To broaden professional horizons and promote further cooperation, a joint webinar on Advanced Steel Seismic Design is to be held on Aug. 19th.

Schedule

1:00pm-2:00pm (UTC+8)

Title: *Development of Seismic Technology for Steel Buildings in Japan*

Satoshi YAMADA, Professor, University of Tokyo

2:00pm-3:00pm

Title: *Research project on Damage Reduction of LGS Partition Walls*

Shoichi KISHIKI, Associate Professor, Tokyo Institute of Technology

3:00pm-4:00pm

Title: *Experimental Study on SHS Columns Subjected to Small Amplitude Cyclic Loading*

Takanori ISHIDA, Assistant Professor, Tokyo Institute of Technology
