

講演会のお知らせ

281st M S L L e c t u r e
(第281回 応用セラミックス研究所講演会)

Title : White OLED technologies for display and lighting
(高性能ディスプレイ・高付加価値照明を実現する白色有機EL技術)

Lecturer : Mr. Takatoshi Tsujimura
KONICA MINOLTA, INC. General Manager of OLED business unit
(コニカミノルタ株式会社 OLED事業部長 辻村 隆俊)

Date/Time : 12/24 (Wed) 14:30-16:00

Place : Meeting Room, R3 Building 1F
(応用セラミックス研究所 R3棟-1F 大会議室)

Abstract : A quarter century has passed since the first paper reporting the fundamental OLED device structure. OLED display has been broadly adopted especially for small-size electronics, such as smart phones. On the other hand, OLED has several merits suitable for large televisions and lighting applications. Future perspective including technologies to utilize such merit of OLED and the approaches to maximize their performance will be discussed.

Contact : Prof. Hideo Hosono (ex:5009)
